

# PREVIEWS

<b>An alternative to biostratigraphic dating</b>	<i>Detrital zircon geochronology is used to systematically investigate maximum depositional ages from well cuttings through the Lake Beds succession in the Rukwa Rift of Tanzania. This study provides the first radioisotopic age constraints and shows that sedimentation in the basin began by 8.7 Ma. . . . .</i>	<i>143</i>
<b>Past performance is not indicative of future results</b>	<i>This paper summarizes findings from Exxon Mobil for quantifying predictions and outcomes on a parameter, volume, and risk basis. Benchmarking geoscience analysis with historical outcomes is useful to audit technical work, identify areas for improvement, and guide future predictions. . . . .</i>	<i>161</i>
<b>Depositional facies and geomechanical properties</b>	<i>Key factors that control geomechanical properties and the regional and stratigraphic variation of these properties are evaluated in the shale of the Horn River Group. Compositionally diverse stratigraphic units provide insights into their controlling factors on geomechanical properties. . . . .</i>	<i>177</i>
<b>A hydrocarbon accumulation model proposed</b>	<i>Oil and seep samples have been collected from the Lawton oil field on the Wichita Mountain uplift, southwestern Oklahoma. Analysis shows that there have been at least two filling episodes for the Lawton oil field, most likely derived from the now absent Woodford Shale. . . . .</i>	<i>205</i>
<b>Triggering factors behind shale diapirism</b>	<i>Wellbore failure observations, well logging data, and drilling information are used to constrain the present-day stress tensor in the northern margin of the West Alboran Basin. Increasing thermal pressures in the deepest confined units promote mud withdrawal and injection in the overburden. . . . .</i>	<i>233</i>
<b>Fault segment linkage</b>	<i>The evolution of the boundary fault and rift basin, Gaoyou Depression, Subei Basin, China, is investigated with three-dimensional seismic data and previous sedimentological studies to serve as an analog for rift basins development with emphasis on oil and gas exploration in eastern China. . . . .</i>	<i>265</i>
