ON COVER — White Sands National Monument (New Mexico). The largest gypsum dune field in the world is located at White Sands National Monument in south-central New Mexico (Tularosa Basin). Here, great wave-like dunes of gypsum sand have engulfed 275 square miles of desert and have created the world's largest gypsum dune field. Photo by Claudio Bartolini.

GEOLOGIC NOTES

<i>The influence of fracture cements in tight Paleogene saline lacustrine carbonate reservoirs, western Qaidam Basin, northwest China</i>	
Lianbo Zeng, Xiaomei Tang, Tiecheng Wang, and Lei Gong	2003
<i>Organic geochemical characteristics and interpreted depositional environment of the Khataiba Formation, northern Western Desert, Egypt</i>	
Mohamed Ragab Shalaby, Mohammed Hail Hakimi, and Wan Hasiah Abdullah	2019

ARTICLES

<i>Sea level and vertical motion of continents from dynamic earth models since the Late Cretaceous</i>	
Sonja Spasojevic and Michael Gurnis	2037
<i>Tectonostratigraphic evolution of the Jurassic extensional basins of the eastern southern Alps and Adriatic foreland based on an integrated study of surface and subsurface data</i>	
Daniele Masetti, Roberto Fantoni, Roberta Romano, Dario Sartorio, and Enrico Trevisani	2065
<i>How clay grain coats inhibit quartz cement and preserve porosity in deeply buried sandstones: Observations and experiments</i>	
Joanna M. Ajdukiewicz and Richard E. Larese	2091
<i>Geographic Information System-based fuzzy-logic analysis for petroleum exploration with a case study of northern South America</i>	
Lisa Bingham, Raúl Zurita-Milla, and Alejandro Escalona	2121
<i>A database approach for constraining stochastic simulations of the sedimentary heterogeneity of fluvial reservoirs</i>	
Luca Colombera, Fabrizio Felletti, Nigel P. Mountney, and William D. McCaffrey	2143
<i>The importance of the degree of cataclasis in shear bands for fluid flow in porous sandstone, Provence, France</i>	
Grégory Ballas, Roger Soliva, Jean-Pierre Sizun, Antonio Benedicto, Thibault Cavailles, and Suzanne Raynaud	2167
